## NEW GLOBAL DUATHLON HOMEPAGE

The crew behind the UK's biggest Triathlon website [www.triathlon247.com](http://www.triathlon247.com) have expanded their product range with the creation of a new global Duathlon site [www.duathlon247.com](http://www.duathlon247.com)

Their aim is to boost the profile of Duathlon both in the UK and abroad. Basically, transfer and availability of information has been a big problem for Duathlon with a lack of support from the regulatory body, the ITU. At a regional and national level in many countries, the sport is run very well but unfortunately at the highest levels of governance, the sport is largely neglected.

This website takes a huge step in providing information, race schedules and international news on the sport of Duathlon and with such a strong and informed team behind it, I am sure it will be a great success and groundswell for duathletes.

The site was launched this month and my site was recently picked as website of the week.

Check it out for yourself and make it a favourite on your browser

Running Regards  
Raf
